RE: Region5 Southern California 700 MHz Regional Planning Committee – Request for approval of frequency allocations changes - Docket 02-378

Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Washington, DC 20554

Dear Secretary Dortch:

At the October 21, 2010 frequency coordination meeting of the Region 5 700 MHz regional planning the attached spreadsheet of changes to frequency allocations was voted on and approved by the members. Region 5 requests the FCC approval of these changes.

These changes are highlighted in Yellow in the spreadsheet. They include additional channel allotments for the County of Riverside so the County can expand to additional sites and to resolve interference concerns impacting the County of Orange and County of San Diego at some sites. It was also necessary to move some existing allocations for the County of Orange in resolving the interference issues. The new allocations for the County of Riverside are labeled as “fill-in”. This designation means the allotments are not useable in all areas of the County of Riverside and must be engineered in on a per site basis. Additionally, new allocations are made to the Los Angeles World Airports (City of Los Angeles) at designated airports: LAX – Los Angeles Airport and Van Nuys for the Van Nuys Airport. These allocations are only for the vicinity of each respective airport.

These changes also reflect the planning preference of the Committee to make allotments to specific agencies, not general allotments to geographical areas. This is due to the extreme needs for spectrum in the Southern California area.

Sincerely

A handwritten signature in cursive script, appearing to read "David Buchanan".

David Buchanan, Chair Region 5 700 MHz Regional Planning Committee
